What's Next?

This lesson summarises what we have learned so far and what's coming up next.

WE'LL COVER THE FOLLOWING

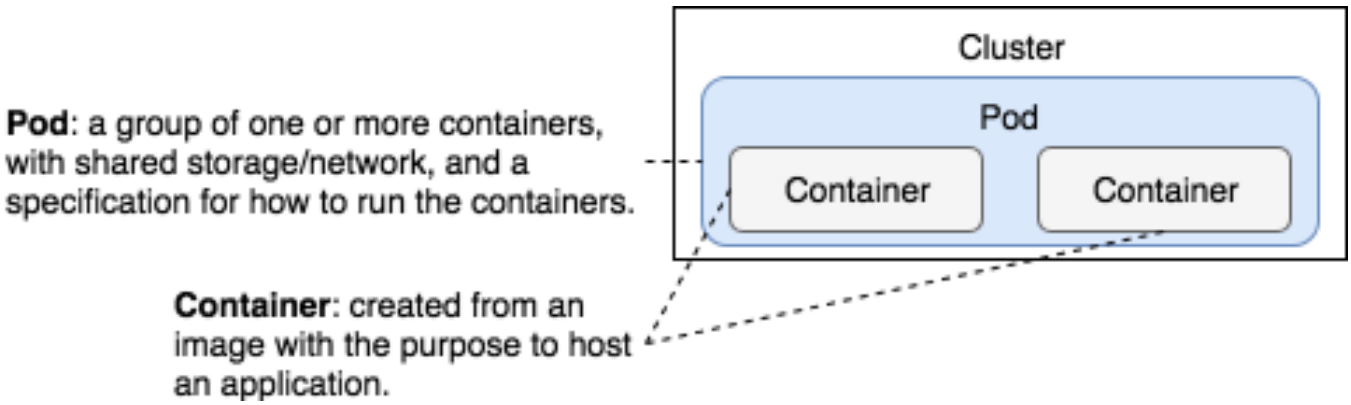
- Destroying the Cluster

Destroying the Cluster

We'll remove the cluster and start the next chapter fresh.

```
minikube delete
```

Please take some time to get more familiar with Pods. They are the most basic and, arguably, the essential building block in Kubernetes. Since, by now, you have a solid understanding of what Pods are, a good next step might be to go through PodSpec v1 core documentation.



The components explored so far

The above illustration shows and defines the Kubernetes components we have explored so far.

In the next chapter, we will explore how to scale Pods using ReplicaSets.
