

Quiz

It's quiz time! Test yourself by solving these questions about recursion.

1

Recursive implementations are always less space-consuming than iterative implementations.

2

Fill in the blank for the following recursive function which calculates the power of a base raised to an exponent:

```
def pow(base,exp):  
    if exp == 0:  
        return 1  
    else:  
        return _____
```

3

What is the output of the following code?

```
def fibonacci(n):  
    if n==1:  
        return 0  
    elif n==2:  
        return 1  
    else:  
        return fibonacci(n-1)+fibonacci(n-2)  
print(fibonacci(7))
```

4

Only recursively defined functions can be implemented recursively.
