

## - Exercise

In this exercise, we will initialize containers using an initializer list.

WE'LL COVER THE FOLLOWING ^

- Exercise 1

### Exercise 1 #

Initialize the following containers:

- `std::array`
- `std::vector`
- `std::set`
- `std::unordered_multiset`

with the `{-10, 5, 1, 4, 5}` initializer list.

```
#include <iostream>

int main() {
    // your code goes here
}
```

The solution is explained in the next lesson.
