

Quiz

1

Have a look at the codes below. Which code shows the new syntax for writing `if` statements in C++17?

2

`constexpr` Lambda functions are constant expressions themselves, but they can invoke methods which are not `constexpr`.

3

C++17 introduces a new way of writing nested namespaces. How can we

3

C++17 introduces a new way of writing nested namespaces. How can we rewrite the code below to fit C++17 standards?

```
namespace Building {  
    namespace Floor {  
        namespace Room {  
            ...  
        }  
    }  
}
```
