

Coding Challenge #1: More Beer Please

This coding exercise is a bit more challenging than the previous ones. In this exercise, you will have to show additional information about the showcase beers.

WE'LL COVER THE FOLLOWING ^

- Problem Statement

Problem Statement

Improve the previous Punk API example to display additional information about the showcased beer : alcohol by volume (ABV), volume and date of first brewage.

Your final output should now also display additional information at the end, like shown below:

Grab a beer

Challenger

Challenger is known for its herbal and fruity characteristics. When used alone in a beer like IPA is Dead, Challenger brings light woodsy notes, floral hints, and delicate green tea, alongside more recognisable citrus notes. As a dual-purpose hop, it also yields great bittering potential, which is ideal in a dry bitter IPA.

Alcohol By Volume: 6.7%. Volume: 20 liters. First brewed on 02/2012.
