

Coding Challenge #4: Updating Colors

This coding exercise is a bit challenging. You will update the colors of all the content on webpage according to the input given in code.

WE'LL COVER THE FOLLOWING ^

- Problem Statement

Problem Statement

The following HTML content defines three paragraphs. Write a program that takes new text color, and a new background color and updates the page accordingly.

For example, if the user enter “Red” as background color and “Black” as the text color, it should look like this:

Paragraph 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec dignissim fringilla dapibus. Curabitur placerat efficitur molestie. Quisque quis consequat nibh. Aenean feugiat, eros eget aliquam vulputate, leo augue luctus lectus, non lobortis libero quam non sem. Aliquam sit amet tincidunt ex, mollis interdum massa.

Paragraph 2

Vivamus at justo blandit, ornare leo id, vehicula urna. Fusce sed felis eget magna viverra feugiat eget nec orci. Duis non massa nibh. Aenean vehicula velit a magna lobortis tempor ut quis felis. Proin vitae dui a eros facilisis fringilla ut ut ante.

Paragraph 3

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis sit amet pharetra massa. Nulla blandit erat nulla, et scelerisque libero varius ut. Praesent bibendum eu magna ullamcorper venenatis. Sed ut pellentesque leo. Sed ultrices sapien consequat odio posuere gravida.

Note: Before testing your code, please run the code by pressing the **RUN** button. Then, you can click the **TEST** button. Otherwise, the test cases won't pass even if the code is correct.
