

- Exercise

In this lesson, we'll solve a challenge that attempts to compute the power of the expression.

WE'LL COVER THE FOLLOWING ^

- Problem Statement

Problem Statement

You have to implement a function which calculates 2^{10} in the program. Try using templates to implement the function.

```
#include <iostream>

// Write your code here

int main() {
    // Call function here
}
```

In the next lesson, we'll look at the different ways to solve this exercise.
