

Verify: Routing

In this section, you can run and verify the app we have built until now.

WE'LL COVER THE FOLLOWING ^

- Project
- Exercise

Project

Environment Variables ^

Key:	Value:
REACT_APP_API_KEY	Not Specified...
REACT_APP_AUTH_...	Not Specified...
REACT_APP_DATAB...	Not Specified...
REACT_APP_PROJEC...	Not Specified...
REACT_APP_STORA...	Not Specified...
REACT_APP_MESSA...	Not Specified...

```
import React from 'react';

const Account = () => (
  <div>
    <h1>Account</h1>
  </div>
);

export default Account;
```

When you run the application and click through the links in the Navigation component, the displayed page component should change according to the URL.

Exercise

1. Confirm your [source code for this section](#).
2. Learn more about [React Router](#).
