

# Coding Challenge #2: Famous Paintings

In this coding exercise, your job is to load the contents of famous paints from a JSON file to the web page.

## WE'LL COVER THE FOLLOWING ^

- Problem Statement

## Problem Statement #

In this exercise, you'll show information about some famous paintings on a web page table. Information about the paintings is located at URL <https://raw.githubusercontent.com/bpesquet/thejsway/master/resources/paintings.json> and has the following content.

```
[
  {
    "name": "The Starry Night",
    "year": "1889",
    "artist": "Vincent Van Gogh"
  },
  {
    "name": "The Scream",
    "year": "1893",
    "artist": "Edvard Munch"
  },
  {
    "name": "Guernica",
    "year": "1937",
    "artist": "Pablo Picasso"
  }
]
```

Start from the following HTML code and write the JavaScript code that fills a table with details about the paintings. Your final output should look like this:

### Some famous paintings

Name	Year	Artist
The Starry Night	1889	Vincent Van Gogh
The Scream	1893	Edvard Munch

The Scream  
Guernica

1893 Edvard Munch  
1937 Pablo Picasso

Output

JavaScript

HTML

## Some famous paintings

Name	Year	Artist
------	------	--------
