

# Quick Quiz!

Let's test our understanding of Ingress resources.

1

Which resources manage external access to the applications running inside a Kubernetes cluster.

2

Like other types of Controllers, Ingress Controller is also a part of the kube-controller-manager binary.

3

When is the Ingress Controller's default catch-all endpoint used?

4

In which section do we specify rules to configure Ingress resources?

5

When an Ingress spec is without rules, it is considered a default backend.
