

- Exercise

In this exercise, we will initialize containers using an initializer list.

WE'LL COVER THE FOLLOWING ^

- Task

Task

Initialize the following containers:

- `std::array`
- `std::vector`
- `std::set`
- `std::unordered_multiset`

with the `{-10, 5, 1, 4, 5}` initializer list.

```
#include <iostream>

int main() {
    // your code goes here
    std::cout << "Hello World";
    return 0;
}
```

Let's go over the solution to this problem in the next lesson.
