

Want to learn more React?

Lastly, I give a brief overview of my next course "Road to React".

If you are planning to dive deeper and learn more React, my course “[Road to Learn React](#)” is a great option! It’s a self-paced course which is designed to help you learn the fundamentals of React and answer all the What’s, Why’s and How’s that you might come across while building a React application. It covers the general concepts, environment setups, patterns and best practices used in a real-world React application. We will also discuss the real-world features like pagination, client-side caching and interactions such as searching, and sorting and learn how to implement them with React!

The image shows a book cover with a solid yellow background. The title 'The Road to Learn React' is written in a large, bold, dark brown font. Below the title, the subtitle 'build a Hacker News App along the way - by robin wieruch' is written in a smaller, white, sans-serif font.

The Road to Learn React
build a Hacker News App along the way - by robin wieruch
