

# Quick Quiz!

Let's test our understanding of this chapter with the help of a quiz.

1

What happens if the server having the `emptyDir` goes down?

2

Which of the following AWS storage should we use when performance is the primary concern?

3

When using AWS, the downside of EBS storage is that?

4

The main difference between Kubernetes Volumes and PersistentVolumes is that PersistentVolumes lifecycle is independent of individual Pods that are using them.
