Challenge 1: Mathematical Calculations

This challenge will test you on mathematical operations in python.

WE'LL COVER THE FOLLOWING ^ Problem Statement Output Coding Exercise

Problem Statement

Given a MathOp() function, try the following mathematical calculations and print the output:

```
(3 / 2)
(3 // 2)
(3 % 2)
(3**2)
```

Output

The expected output:

```
1.5
1
1
1
9
```

Coding Exercise

Suggestion: Check the Python library reference for more details!

Play with the following code to print the expected output.

Let's move on to the detailed solution of the above problem.
