Purification Exercises

Exercises on making pure versions of impure functions.

Purify this function

```
const assoc = (key, value, object) => {
  object[key] = value;
};
```

Purify this function. It should work in just one line!

```
const getNames = (users) => {
  console.log('getting names!');
  return users.map((user) => user.name);
};
```

Purify this function

Purify this function
