## Search

In this lesson, we'll see the implementation of the second look-up function for regex statements: regex\_search.

std::regex\_search checks if text contains a text pattern. You can use the
function with and without a std::match\_results object and apply it to a C
string, a C++ string or a range.

The example below shows how to use std::regex\_search with texts of type
const char\*, std::string, const wchar\_t\* and std::wstring.

```
#include <iostream>
#include <regex>
#include <string>
int main(){
  std::cout << std::endl;</pre>
  // regular expression holder for time
  std::regex crgx("([01]?[0-9]|2[0-3]):[0-5][0-9]");
  // const char*
  std::cout << "const char*" << std::endl;</pre>
  std::cmatch cmatch;
  const char* ctime{"Now it is 23:10."};
  if (std::regex_search(ctime, cmatch, crgx)){
     std::cout << ctime << std::endl;</pre>
     std::cout << "Time: " << cmatch[0] << std::endl;</pre>
   }
  std::cout << std::endl;</pre>
  // std::string
  std::cout << "std::string" << std::endl;</pre>
  std::smatch smatch;
  std::string stime{"Now it is 23:25."};
  if (std::regex_search(stime, smatch, crgx)){
    std::cout << stime << std::endl;</pre>
    std::cout << "Time: " << smatch[0] << std::endl;</pre>
```

```
std::cout << std::endl;</pre>
  // regular expression holder for time
  std::wregex wrgx(L"([01]?[0-9]|2[0-3]):[0-5][0-9]");
  // const wchar_t
  std::cout << "const wchar_t* " << std::endl;</pre>
  std::wcmatch wcmatch;
  const wchar_t* wctime{L"Now it is 23:47."};
  if (std::regex_search(wctime, wcmatch, wrgx)){
       std::wcout << wctime << std::endl;</pre>
       std::wcout << "Time: " << wcmatch[0] << std::endl;</pre>
  }
  std::cout << std::endl;</pre>
  // std::wstring
  std::cout << "std::wstring" << std::endl;</pre>
  std::wsmatch wsmatch;
  std::wstring wstime{L"Now it is 00:03."};
  if (std::regex_search(wstime, wsmatch, wrgx)){
    std::wcout << wstime << std::endl;</pre>
    std::wcout << "Time: " << wsmatch[0] << std::endl;</pre>
  }
  std::cout << std::endl;</pre>
}
```

std::search
