Coding Challenge #3: Minimum of Two Numbers

In this coding exercise, you have to input two numbers and find the smallest number out of the both.

Problem Statement

Let's pretend the JavaScript `Math.min()` function doesn't exist. Complete the below program so that the `min()` function returns the minimum of its two received numbers.

Input

```
min(4.5, 5)
min(19, 9)
min(1, 1)
```

Expected Output

```
4.5

9

1
```

Coding Exercise

```
function min(){
```

```
    // Write - Your - Code

}
```
