# Quiz

A short quiz to test the basic understanding of concepts explained in this chapter!

1 The `Console` is a class in the `System`

2 We use the ".", dot, operator to separate subordinate program elements

3 What is the error in the code below?

```
using System;

class Course
{
    static void main()
    {
```

```
        Console.WriteLine("Welcome to C# course");

    }
}
```

4   The Main method cannot be declared with a parameter and hence cannot return an integer value

5   The WriteLine method takes a string and a variable number of additional arguments
