Coding Challenge #5: Neither Yes nor No

This coding exercise is based on a combination of loops and if-else statements. Write a code that doesn't stop prompting for user input unless the user enters "yes" or "no". Good luck!

Problem Statement

Write a program that plays "neither yes, nor no" with the user. Specifically, the programs asks the user to enter text until either "yes" or "no" is typed, which ends the game.

Input

```
Hello
World
yes
```

Expected Output

```
Hello
World
Game Ends
```
