Summary

In this lesson, we will take a look at what you learned about Cloud Firestore in this section of the course.

WE'LL COVER THE FOLLOWING ^

- What you learned

What you learned

1. How to connect to Cloud Firestore

2. How to create documents

3. How to read from collections

4. How to delete collections

It's now time to deploy our application! You will learn all about Firebase Hosting in the next section of this course. Your site will be fully live and ready for the world to see. Once deployed Firebase will provide you a unique project URL. You can use this URL to invite friends, family or coworkers to chat on your app.
