Compiler Support

Let's look at the compiler support for the topics in this chapter.

Feature	GCC	Clang	MSVC
Removing `register` keyword	7.0	3.8	VS 2017 15.3
Remove Deprecated `operator++` (bool)	7.0	3.8	VS 2017 15.3
Removing Deprecated Exception Specifications	7.0	4.0	VS 2017 15.5
Removing trigraphs	5.1	3.5	VS 2010
New auto rules for direct-list-initialisation	5.0	3.8	VS 2015
`static_assert` with no message	6.0	2.5	VS 2017
Different begin	6.0	3.6	VS 2017

and end types			
in range-based for			

With that, we have finished this section of the course. The following chapter talks about removed and deprecated library features.
