Exercise 2: Displaying Output using Delegates

In this exercise, you'll have to call a function and print its output using delegates.

Problem Statement

In this exercise, you're given a function `average()` in a class called `ResultClass`.

Your job is to display the result of `average()` using delegates!

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

Good Luck!

Exercise	Solution

```csharp
using System;
public class example
{
    //Declare your delegate here
    static void Main(string[] args)
    {
        //Write your code here
    }
}

public class ResultClass
{
    public int average(int a, int b)
    {
        return (a + b)/2;
    }
}
```
