Exercise 12: Our Final App!

We will run and verify our entire app in this section with firebase and all the functionalities.

Project

Environment Variables		∧
Key:	**Value:**	
REACT_APP_API_KEY	Not Specified...	
REACT_APP_AUTH_...	Not Specified...	
REACT_APP_DATAB...	Not Specified...	
REACT_APP_PROJEC...	Not Specified...	
REACT_APP_STORA...	Not Specified...	
REACT_APP_MESSA...	Not Specified...	

```
import React from 'react';

import { AuthUserContext } from '../Session';
import { PasswordForgetForm } from '../PasswordForget';
import PasswordChangeForm from '../PasswordChange';
import { withAuthorization } from '../Session';

const AccountPage = () => (
  <AuthUserContext.Consumer>
    {authUser => (
      <div>
        <h1>Account: {authUser.email}</h1>
        <PasswordForgetForm />
        <PasswordChangeForm />
      </div>
    )}
  </AuthUserContext.Consumer>
);
```

```
const authCondition = authUser => !!authUser;

export default withAuthorization(authCondition)(AccountPage);
```

Exercise

1. Confirm your source code for the last section.

Reading Task

1. Read more about how to read and write data to Firebase's real-time database.
